

V01

HP 12 - 18 / KW 8 - 13

SPADER FOR SINGLE-SHAFT POWER-DRIVEN CULTIVATOR

V01

HP 12 - 18 / KW 8 - 13

TECHNICAL CHARACTERISTICS

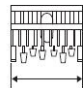

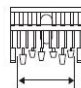

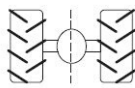

Its lightweight and reduced dimensions makes the spading machine very useful for spading work in greenhouses, vineyards and gardening of all kinds (vegetable, flowers, etc.). There is a special linkage for each type of motorized cultivator, which, together with this lightweight implement creates a perfect balance between machines, and therefore, rendering it easy to use. The penetration of the small blades into the soil is adjustable, and therefore, allows the equipment to be suitable to every kind of situation.

STANDARD EQUIPMENT

- Safety device CE
- Flange coupling
- Levelling cover

OPTION

- Transfer wheel
