HP 60 / 120 - KW 44 / 88

STONE BURIER

It is an ideal machine to prepare the seed bed on any type of soil, including hard and clayey soil, both in the presence of stones or of cultivation residues. The I5 stone burier makes it possible to place stones, cultivation residues, grass and all that is present on the field deep in the ground, leaving finely tilled soil on the surface. It is also a good machine for the preparation of game fields and gardens.

I5

HP 60 / 120 - KW 44 / 88
